

BRAND DEVELOPMENT & STRATEGIC POSITIONING

SIYAVIKELA

SECURITY SERVICES

Protection
that connects.

Professional protection. Transparent service. Community accountability.

DOBSONVILLE · SOWETO · GAUTENG

STRATEGIC CONCEPT / OCTOBER 2026

STRATEGIC OVERVIEW

A local security brand, built for lasting trust.

Six connected phases turn a community-rooted proposal into a professional, accountable brand and service model.

01

FOUNDATION

Define purpose, services, community and readiness.

02

POSITIONING

Clarify why clients should trust and choose Siyavikela.

03

BRAND STRATEGY

Set the promise, values, personality and voice.

04

CORPORATE IDENTITY

Systemise logo, colour, typography and applications.

05

SERVICE EXPERIENCE

Make the promise tangible in every interaction.

06

GROWTH & PARTNERSHIPS

Validate demand, compliance, economics and scale.

THE STRATEGIC PRINCIPLE

Build trust before scale. Establish compliance before launch.

ILLUSTRATIVE COMMUNITY VISUAL

A safer community starts with a connected system.

The supplied proposal identifies concerns in Dobsonville: house robberies and break-ins; dark streets and malfunctioning lights; hotspots associated with illegal dumping; communication gaps; and a need for a visible local presence.

STARTING ASSUMPTIONS · VALIDATE BEFORE USE

33 people noted at the 5 August 2026 meeting

180–200 estimated households in the proposed target area

These figures are supplied-proposal inputs, not independently verified market research. Confirm area boundaries, household counts and service demand through a survey.

Define the reason to exist.

A community-rooted security company must make its purpose visible through lawful operations, reliable communication and documented service.

PURPOSE

Help create safer communities by providing professional, accountable security services that respond to local needs and protect people, property and peace of mind.

MISSION

Protect people, property and digital environments through trusted local expertise, appropriate technology and professional integrated security solutions—building safer communities today and a trusted company for tomorrow.

VISION

Safer communities. Protected assets. Secure digital futures.

OPERATING PRINCIPLE

Protection must be experienced, not merely promised.

Translate every promise into a defined service, trained people, a clear escalation process and a transparent client agreement.

One operating philosophy. Four service pillars.

The service architecture should support growth while staying clear enough for customers to understand.

01
UNDERSTAND
Assess need, risk and requirements.

02
PREPARE
Define compliant people, tools and procedures.

03
CONNECT
Coordinate with clients and safety partners.

04
PROTECT
Deliver the agreed authorised service.

05
ACCOUNT
Record, communicate and report.

06
IMPROVE
Use feedback and evidence to learn.

01
PHYSICAL SECURITY
Guarding, residential and commercial security, patrol and authorised response.

02
ELECTRONIC SECURITY
Alarms, panic alerts, CCTV and access monitoring.

03
TRACKING & PERSONAL SAFETY
Potential vehicle tracking and personal safety devices.

04
COMMUNITY COORDINATION
Structured reporting and appropriate safety collaboration.

Important: these are strategic categories—not confirmation that each service is currently operational. Offer only what is authorised, equipped, staffed and supported by clear procedures.

Built from within the community.

Dobsonville is the proposed first focus; expansion should follow evidence, capability and compliance.

PRIMARY

Residents & households

Clear service options, practical information and a way to raise concerns.

SECONDARY

Local businesses

Protection aligned to premises, operating hours and commercial risk.

INSTITUTIONAL

Schools & organisations

Potential safety cooperation with agreed scope and safeguarding.

FUTURE

Property & fleet clients

New markets only when the operating model can support them.

PARTNER ECOSYSTEM

FOUNDING CONTRIBUTORS · ROLES AND CREDENTIALS TO VERIFY

Thato Radise
Marketing, community engagement, business development & partnerships

Andile Dambuza
Security operational development; verify PSiRA status

Tendi Matloha
Proposed vehicle tracking and security operations; verify PSiRA status

Papi Raborife
Technology, innovation, service and brand development

The supplied proposal separately identifies two CIPC-registered directors. Verify official records, appointments and public role descriptions before release.

PROFESSIONAL PROTECTION.

ROOTED IN COMMUNITY.

For households, businesses and institutions seeking dependable security, Siyavikela aims to combine local understanding, coordinated communication and appropriate technology with transparent service.

01 / LOCAL PRESENCE

Informed by real community concerns.

02 / COORDINATED OPERATIONS

Clear reporting, escalation and follow-through.

03 / APPROPRIATE TECHNOLOGY

Tools selected for need, cost and capability.

04 / TRANSPARENT SERVICE

Agreed scope, honest claims and documented performance.

LOCAL-INSPIRED VISUALISATION · NOT DOCUMENTARY EVIDENCE

A promise with three clear expectations.

A strong brand is useful to clients only when it can be demonstrated in service delivery.

01 / PROFESSIONAL PROTECTION

Services delivered by appropriately qualified personnel under required authorisations and procedures.

02 / TRANSPARENT SERVICE

Clients understand what is included, what it costs and how incidents are handled.

03 / COMMUNITY ACCOUNTABILITY

Listen to feedback, explain responsibilities and report on agreed service delivery.

THE BRAND TERRITORY

PROTECTION THAT CONNECTS.

Connect people to information, clients to response arrangements, security operations to appropriate technology and communities to relevant safety partners.

VALUE

FOR RESIDENTS

Clear options, service limits and a

VALUE

FOR BUSINESSES

A risk-aligned scope and agreed service

VALUE

FOR PARTNERS

Clear roles, lawful cooperation and

Reassurance through professionalism—not fear.

A brand voice should be confident, trustworthy, observant, organised, respectful and open to useful innovation.

01 / INTEGRITY	Honest, lawful and responsible.
02 / VIGILANCE	Prepared and aware of responsibility.
03 / COMMUNITY	Respectful and approachable.
04 / ACCOUNTABILITY	Document, communicate, own the service.
05 / INNOVATION	Useful tools, privacy respected.

TONE OF VOICE

Instead of: “We guarantee your safety.”

Say: “We deliver the agreed security services and communicate clearly about our responsibilities.”

BRAND STORY

Challenge: security concerns and communication gaps.
Insight: local knowledge needs systems and capability.
Response: connect people, process and technology.
Ambition: earn trust through service quality.

COMMUNITY LINE / Protecting our homes. Strengthening our community.

The existing mark already has a point of view.

Retain the shield-and-eye recognition, then prepare a practical, production-ready system.

VISUAL MEANING

SHIELD	Protection and defence.
EYE	Vigilance and awareness.
RED CENTRE	Alertness and focus.
SILVER / WHITE	Clarity, precision and professionalism.

Prepare primary colour, reversed white, single-colour, symbol-only, horizontal lock-up and compact digital versions. Provisional clear space: ¼ shield height. Starting minimum: symbol 24 px / 12 mm; full lock-up 160 px / 38 mm. Test embroidery, vehicle graphics, print and small-screen use.

A disciplined visual language.

Working values inferred from the supplied visual direction. Confirm against vector master artwork and test for print reproduction and accessible contrast.

MIDNIGHT CHARCOAL

#171B23

RGB 23 / 27 / 35

CMYK ≈ 35 / 23 / 0 / 86

Primary backgrounds, uniforms and digital layouts.

ALERT RED

#B51F35

RGB 181 / 31 / 53

CMYK ≈ 0 / 83 / 71 / 29

Accents, alerts and calls to action.

SECURITY SILVER

#C4C9D1

RGB 196 / 201 / 209

CMYK ≈ 6 / 4 / 0 / 18

Supporting surfaces, borders and diagrams.

CLEAN WHITE

#FFFFFF

RGB 255 / 255 / 255

CMYK ≈ 0 / 0 / 0 / 0

Body copy, documents and contrast.

TYPOGRAPHY & ACCESSIBILITY

BOLD MODERN SANS — Manrope / Inter; Arial fallback · headlines 600–700

LEGIBLE SANS — 16 px web minimum · 9 pt print · 1.5 line height

Suggested balance: 60% charcoal / 25% silver-white / 10% white space / 5% red. Approximate CMYK; proof to printer profile.

Photography: respectful local context, no fear-based styling or unapproved marks; label every concept mock-up.

Visible, understated, professional.

Use a charcoal or neutral base, a clear shield-and-wordmark lock-up and a restrained red signal line. Vehicle graphics should identify the actual service without implying police authority.

RULES BEFORE DEPLOYMENT

- Brand only vehicles authorised for the service.
- Use verified contact details only.
- No false police markings, blue lights or unsupported response claims.
- Test legibility at distance and in low light.

CONCEPT BRANDING MOCK-UP · NOT AN OPERATING FLEET CLAIM

04 / SERVICE APPLICATION · ELECTRONIC SECURITY

Technology with a clear use case.

Potential alarms, panic alerts, access monitoring and CCTV solutions. Select equipment around need, affordability, support and reliability—not novelty.

CAPABILITY	What will the product actually do?
COST	Purchase, rental, installation and ongoing fees?
PRIVACY	What information is collected and who can access it?
SUPPORT	Who maintains, repairs and responds to faults?

INSTALLATION / CLIENT CONVERSATION CONCEPT

Useful tools. Responsible deployment.

Potential vehicle tracking and personal safety devices should be separately scoped, priced and supported. Drone imagery is conceptual only: any real operation requires applicable aviation, privacy, site and operational permissions.

Clear communication is part of protection.

01	INCIDENT REPORTED
02	RECORD & ASSESS
03	ESCALATE APPROPRIATELY
04	COORDINATE AUTHORISED RESPONSE
05	UPDATE CLIENT AS AGREED
06	DOCUMENT & REVIEW

Coverage hours, staffing, channels and escalation rules must be defined before the service is offered. Emergency incidents must be directed to the appropriate service; Siyavikela is not a substitute for SAPS or emergency medical services.

ILLUSTRATIVE UNIFORM MOCK-UP · NOT AN ISSUED UNIFORM

04 / APPLICATION · UNIFORM

Professional. Recognisable. Approachable.

Concept direction: clean charcoal uniform, subtle red piping and a legible shield patch. The design should create confidence, not an unnecessarily militaristic impression.

UNIFORM SYSTEM

- Embroidery at a legible size.
- Verified identification and role.
- High-visibility apparel where appropriate.
- Review applicable industry requirements.

One system, across the kit.

Radio, phone, panic button, light, sensors and camera are concept items only. Choose equipment against a defined use, training, support and privacy process.

SIYAVIKELA
SECURITY SERVICES

CLIENT PROPOSAL / INCIDENT FORM / SERVICE REPORT

Operational documents are part of the identity.

DIGITAL & IDENTIFICATION

Website · Email · Staff ID

Use verified details; separate current services from planned services.

EQUIPMENT AND STATIONERY VISUALS ARE ILLUSTRATIVE CONCEPT MOCK-UPS.

Good security respects its community.

RESIDENTS

Listen, assess, explain, enrol, deliver, communicate, review.

BUSINESSES

Discover, assess risk, propose, agree, implement, review.

SCHOOLS

Agree scope with management; put safeguarding first.

PARTNERS

Coordinate within each organisation’s lawful role.

Make the service easy to understand—and evaluate.

A website should explain what is available now, what is proposed, who the service is for and how to enquire.

HOME | ABOUT | SERVICES | RESIDENTIAL | BUSINESS | TECHNOLOGY | COMMUNITY SAFETY | CONTACT

01

PARTICIPATION

Active clients, cancellations, renewals.

02

DELIVERY

Agreed schedules completed; incident records.

03

EXPERIENCE

Feedback, complaints, resolution, referrals.

04

TECHNOLOGY

Equipment uptime and support resolution.

05

COMPLIANCE

Registrations, training and authorisations maintained.

Set targets only after scope and resources are defined. Incident counts alone are not a simple success measure: reporting may rise when residents trust the reporting process.

Validate the model before launch.

Illustrative gross monthly subscription revenue from the supplied proposal. These are examples—not approved prices, profit forecasts or service commitments.

100 × R200	150 × R300	190 × R300	190 × R500
R20,000	**R45,000**	**R57,000**	**R95,000**
GROSS / MONTH	GROSS / MONTH	GROSS / MONTH	GROSS / MONTH

BEFORE PRICING IS FINAL, COST THE REAL SERVICE

- Staffing & hours
- Vehicles & fuel
- Equipment & maintenance
- Insurance & compliance
- Technology & suppliers
- Administration & taxes

Validate the estimated 180–200 households with a survey. Model collection, bad debt, cost-to-serve and sustainable margin. Separate optional technology charges where appropriate.

Build credibility through compliance and capability.

A registration, a supplier conversation, a formal partnership and an awarded contract are different milestones. Describe each accurately.

GATE 01

01 / COMPANY & PERSONNEL

Verify CIPC records, PSiRA requirements and the status of every relevant person. Confirm requirements for each proposed service.

GATE 02

02 / DELIVERY & RISK

Define service area, staffing, training, insurance, incident procedures, contracts and client disclosures.

GATE 03

03 / TECHNOLOGY & PRIVACY

Review CCTV, tracking and monitoring data, access, retention, security and supplier roles.

GATE 04

04 / PARTNERSHIPS

Document scope, responsibilities, cost, support and lawful escalation. Proposed discussions are not partnerships.

IMPORTANT OPERATING GATE

The supplied proposal states that CIPC registration occurred on 30 September 2026 and notes outstanding PSiRA and operational requirements. Verify all current official status before public use or launch. CIPC registration alone does not authorise every regulated private-security service.

Confirm requirements with PSiRA, relevant authorities and qualified advisers. This strategy is not legal advice.

Start with evidence and trust.

The first marketing objective is to validate demand—not to collect subscriptions before the operating model is ready.

01
COMMUNITY ENGAGEMENT
Explain the proposal and listen.

02
HOUSEHOLD SURVEY
Verify the market and affordability.

03
SERVICE PROPOSAL
Present real capabilities, price and terms.

04
CLIENT ONBOARDING
Obtain informed agreement and explain scope.

05
REVIEW & REFINE
Measure delivery, costs and feedback.

USEFUL EARLY CHANNELS

- Community meetings
- Printed service proposal
- Professional website
- Business introductions
- Approved community groups
- Verified case studies after launch

THE BUSINESS ENGINE

Need → service design → capability → delivery → accountability → trust → sustainable growth

IMPLEMENTATION ROADMAP

First 90 days: verify, validate, decide.

Proposed planning windows—not guaranteed launch dates. If readiness gates are not met, move the launch.

DAYS 01–30

FOUNDATION & VERIFICATION

- Verify compliance & readiness
- Define proposed service scope
- Gather costs & supplier quotes
- Prepare household survey
- Confirm roles & accountability

DAYS 31–60

VALIDATION & SYSTEM DESIGN

- Conduct community research
- Review demand & affordability
- Refine budget and pricing
- Develop CI & business documents
- Document service procedures

DAYS 61–90

DECISION & PREPARATION

- Assess feasibility against evidence
- Confirm agreements and resources
- Finalise authorised services
- Prepare client onboarding
- Decide if a compliant pilot is viable

SIYAVIKELA SECURITY SERVICES

PROTECTION THAT CONNECTS.

PURPOSE	Create safer communities through professional, accountable security.
POSITION	Community-rooted. Professionally operated.
PROMISE	Professional protection. Transparent service. Community accountability.
PRINCIPLE	Understand → prepare → connect → protect → account → improve.

BUILD TRUST BEFORE SCALE.

Establish compliance before launch. Prove service quality before making bigger promises.
